- Business users – from SMB to enterprise
- Public WiFi hotspots' owners
- ISP's entire customer base

which can be protected with  
uniform filtering rules

# SafeDNS state-of-the art technology

Allows customers to  
efficiently filter the web  
and increase end users'  
security online

# SafeDNS technology

## **DNS**

as a base protocol of filtering

**High performance**  
web filter

## **Ads blocker**

filtering out banner, context, video, audio, and pop-up ads

## **Scalable platform**

which can process DNS queries from almost unlimited number of users without any delay

## **Own domain database**

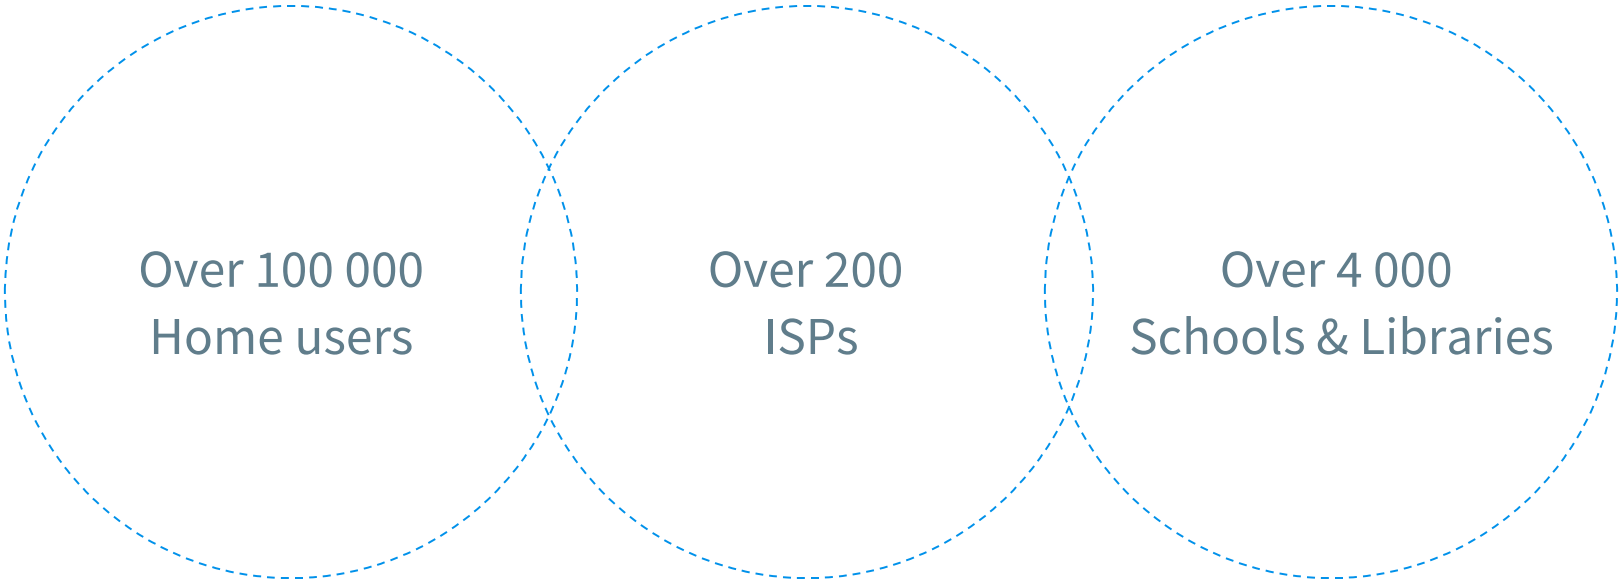

with daily updates  
(over 9 million domains covering billions of pages, 55+ categories)

# Why SafeDNS?

# SafeDNS Customers

Over 100 000  
Home users

Over 200  
ISPs

Over 4 000  
Schools & Libraries

# With SafeDNS ISP can offer end users

## **Content filter**

for educational institutions and libraries

## **Corporate filter**

enabling employers to manage, monitor and control staff online activity

## **Parental control**

service allowing parents to protect children from harmful content

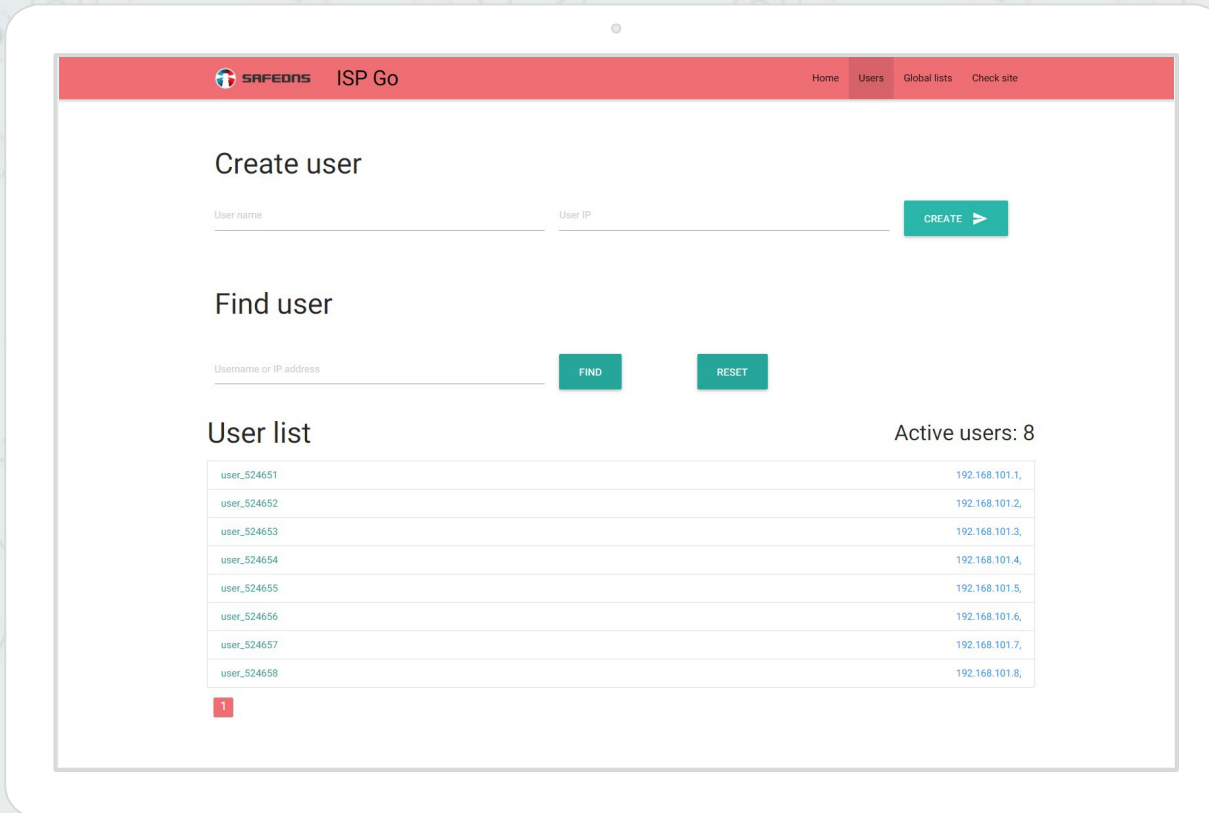

## **WiFi protection**

to prevent kids from visiting inappropriate resources from public WiFi networks

## **Extra protection**

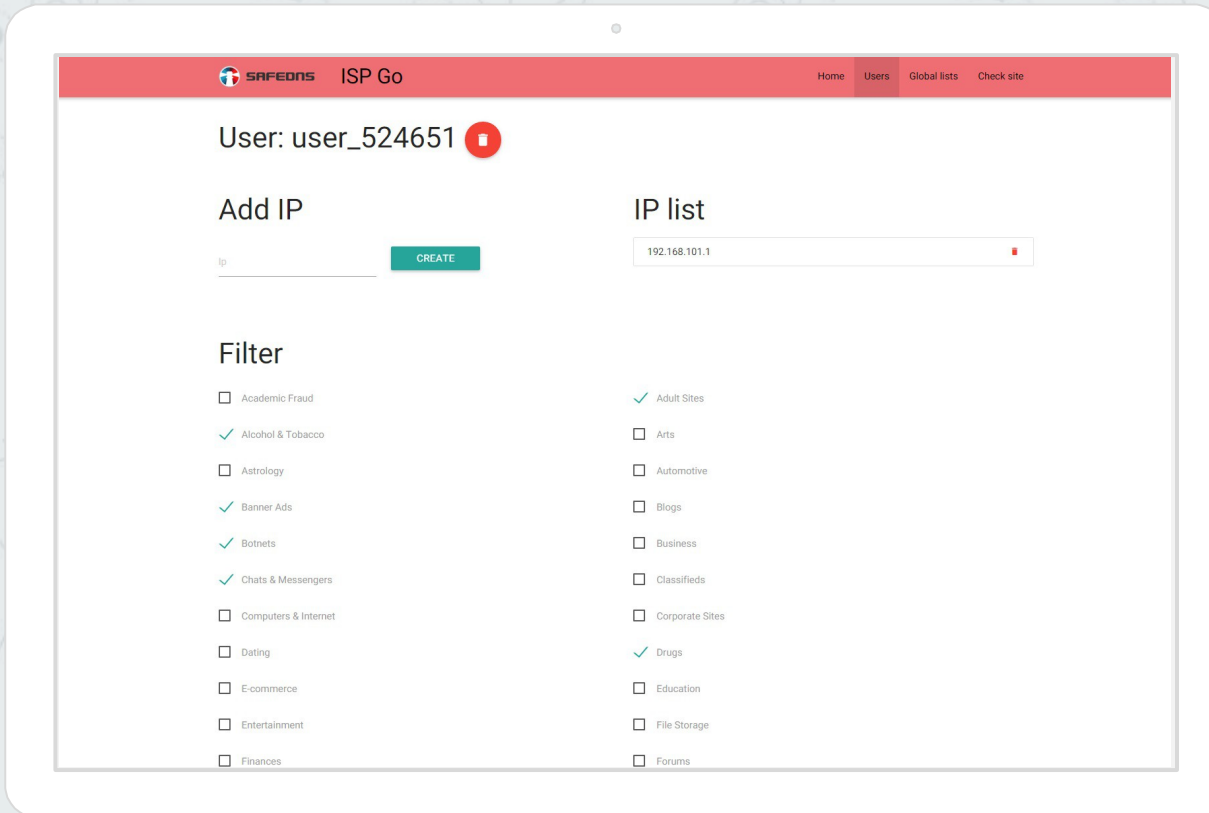

against phishing, malware and botnets

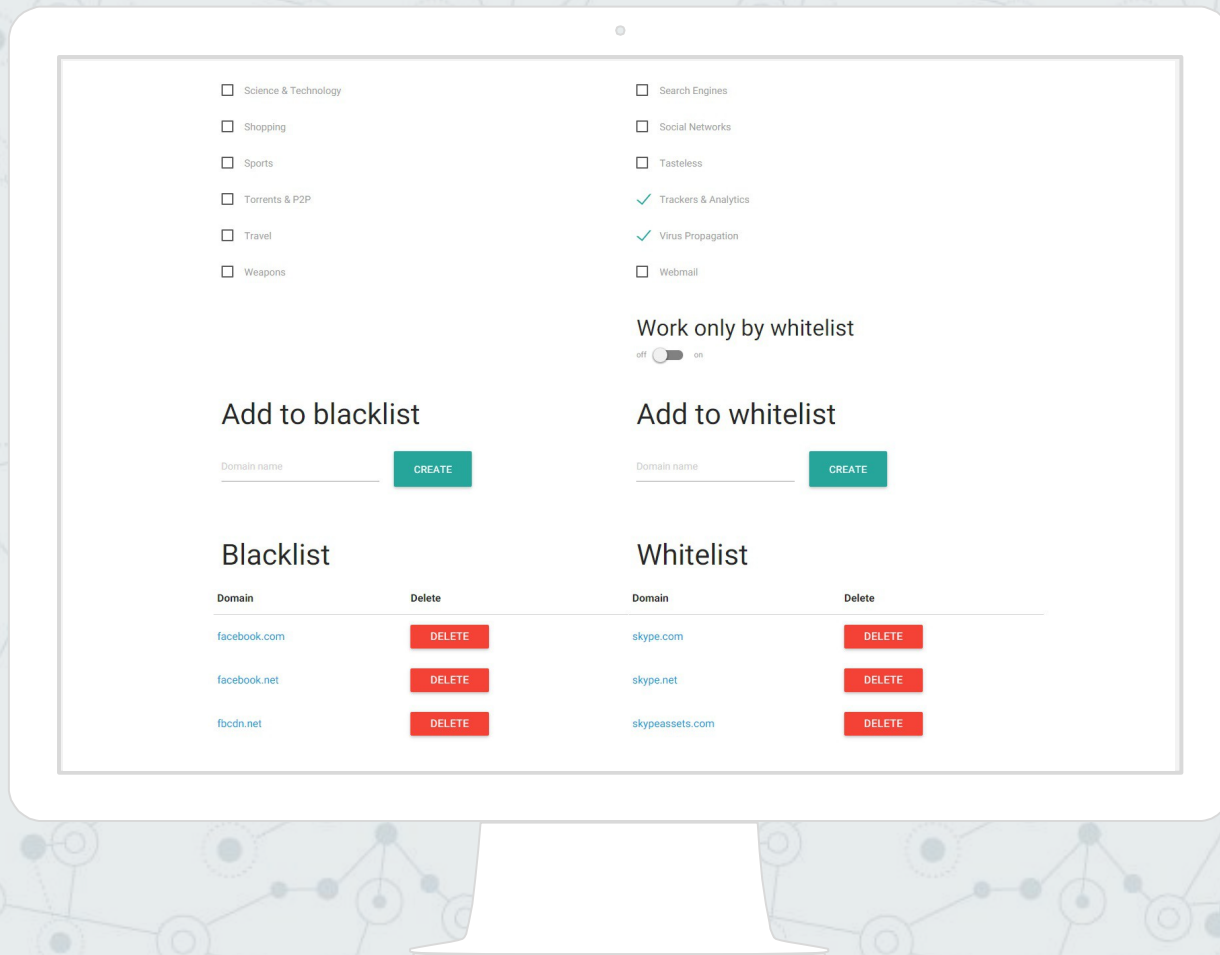

## Ready-to-use administrative frontend

Allows to easily create, find and manage web filtering service user accounts

## User's Categories

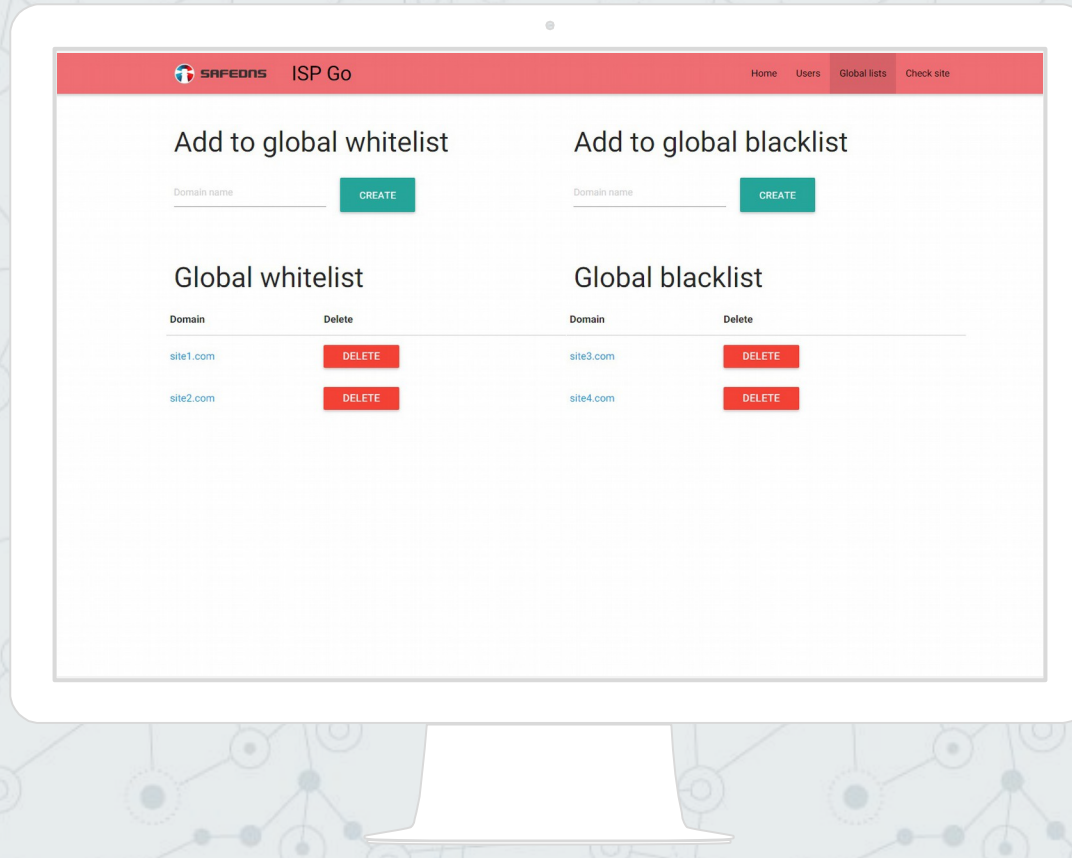

You can set any filtering rules for an end user

## Additional user's settings

Here you can create individual white and black lists

## On Global list page

You can set uniform black/white lists for all your end users

# Our filtering process is simple

**Filtered users**

**SafeDNS ISP Go platform**

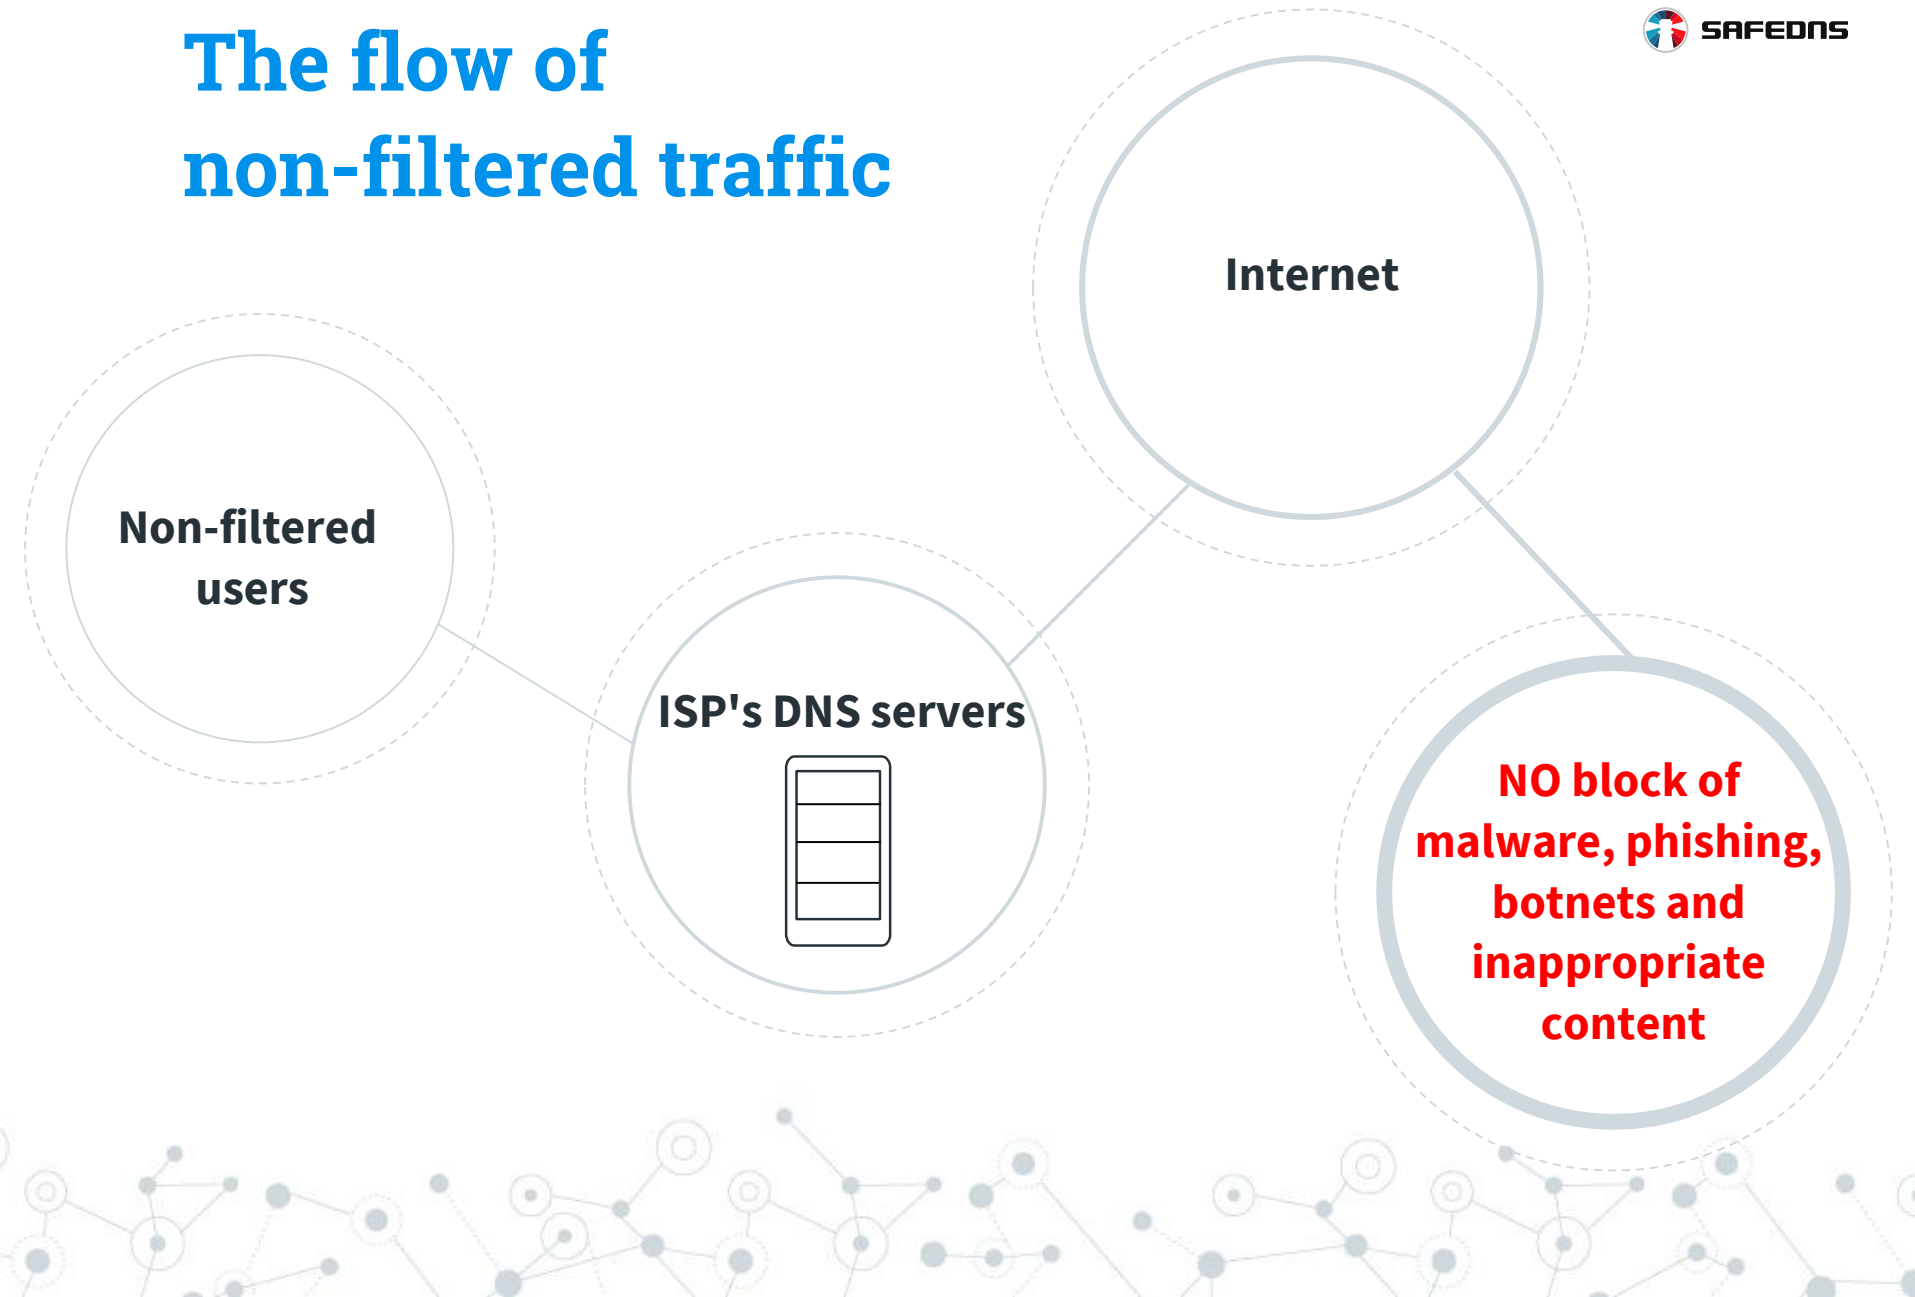

**ISP's DNS**

**Safe internet**  
without malware,  
phishing,  
botnets and  
inappropriate  
content

# The flow of non-filtered traffic

# Benefits you get

## Easy scalability

of our software platform  
- to accommodate any  
number of your end users

## Recognition of

provider's internal IPs by  
ISP Go allows it to set  
individual filtering rules  
for individual end users

## Easy integration

of our software platform  
with your existing  
systems and portals

## Near zero costs

of deployment and  
low TCO

## Open API

ensures you can easily  
manage the use of the  
filtering platform

## ISP's frontend

lets you create/delete  
user accounts, introduce  
uniform filtering rules for  
all users

# And more benefits

## Extra protection

from online threats  
including those outbound  
from infected end users'  
devices

## Regulatory compliance

achieved with fine tuning  
of filtering rules by choosing  
among 50+ categories of  
domains

## Wider range of

products and services  
- an opportunity to  
increase ARPU and  
revenue in general

## Competitive advantage

which will surely help you  
to differentiate from  
other internet providers

## Extra promotion

of your brand in case you  
choose to white label  
our solution

## Marketing channel

which can be very  
important in the often  
crowded market

# Thanks!
